

Shreya Singla

Haryana, India | +91-9991151827 | shreyasingla272@gmail.com | linkedin.com/in/shreyasingla

PROFESSIONAL SUMMARY

Economics postgraduate with experience in time-series modeling (ARIMA), financial analysis, and data-driven research. Skilled in Python, SQL, and Power BI for building quantitative models and extracting actionable insights.

EDUCATION

- **M.Sc. Economics** Jul 2025 - Present
Indian Institute of Technology (IIT), Kanpur, *CGPA: 7.95/10*
Relevant Coursework: Econometrics, Game Theory, Microeconomics, Macroeconomics, Linear Programming, Computational Methods in Economics (Python)
- **B.A. (Hons.) Economics** July 2019 - May 2022
University of Delhi, *CGPA: 8.419/10*
Relevant Coursework: Data Analysis with R, Mathematical Methods in Economics

PROJECTS

- Time Series Data Analysis (Python + SQL)** Nov 2025
 - Implemented ARIMA/SARIMA models to analyze and forecast time-series financial data (10,000+ observations).
 - Performed stationarity testing (ADF test), differencing, and autocorrelation (ACF/PACF) analysis.
 - Improved forecast reliability by approx. 15 % compared to naïve baseline models.
 - Built visualizations (trend, seasonality decomposition, moving averages) using Matplotlib.
- Mutual Fund Analysis Dashboard** May 2025
 - Analyzed 50+ mutual funds across multiple asset classes using Python (Pandas, NumPy).
 - Computed key financial metrics: Sharpe Ratio, Volatility, CAGR, Rolling Returns.
 - Built interactive Power BI dashboard with dynamic filters and risk-return comparison charts.
 - Enabled data-driven investment insights by benchmarking funds against market indices.
- Customer Segmentation (Power BI)** Dec 2024
 - Applied RFM (Recency, Frequency, Monetary) segmentation on customer dataset (5K–10K records).
 - Classified customers into high-value, churn-risk, and inactive segments.
 - Developed Power BI dashboards using DAX measures and data modeling.
 - Improved targeting efficiency by identifying top 20% high-value customers contributing majority revenue.
- Financial Dashboard Analysis (SQL + Power BI)** Aug 2024
 - Processed structured financial datasets (50K+ rows) using SQL for querying and transformation.
 - Wrote complex queries involving joins, aggregations, and window functions.
 - Built KPI dashboards tracking revenue trends, customer behavior, and spending patterns.
 - Reduced manual reporting effort by 30% through automated dashboarding.

SKILLS

- **Programming & Analytics:** Python (Pandas, NumPy, Matplotlib), SQL (MySQL), R, Power BI, Excel
- **Quantitative Methods:** Time Series Analysis, Econometrics, Statistical Modeling, Forecasting
- **Financial & Business Analysis:** Financial Data Analysis, Risk Metrics, Market Research
- **Core Competencies:** Data-driven decision making, quantitative research, analytical thinking, structured reporting

LEADERSHIP AND ACTIVITIES

- **M.Sc. Students' Representative, DPGC, Department of Economics, IIT Kanpur:** Facilitated communication between the student body and the faculty, provided feedback in academic curriculum and advised on students' welfare. Oct 2025 - Present
- **President, Book Club, D.A.V. Cent. Public School, Sirsa:** Presided over meeting, set the goals and monitored progress. Apr 2016 – Mar 2017

CERTIFICATIONS

- Data Analysis and Visualization with Power BI by Microsoft
- Introduction to Data Analytics using Python by IBM
